PROPOSED BREWSTER WIND FARM – COMMUNITY INFORMATION SESSIONS

I am writing to invite you to join us at one of our upcoming community information sessions about the proposed Brewster Wind Farm. These information sessions will provide attendees with an opportunity to find out more about the proposed wind farm, as well as ask questions directly of RE Future representatives.

Venue: Beaufort Shire Hall, Beaufort.

Dates and times:

- Thursday, 10 October from 3:00 pm – 4:30 pm;
- Thursday, 10 October from 4:30 pm – 7:00 pm;
- Thursday, 17 October from 3:00 pm – 4:30 pm; and
- Thursday, 17 October from 5:30 pm – 7:00 pm.

Please note that if there is sufficient interest, we will happily organise further sessions in the coming months, or at an alternative time to those proposed.

Session themes

The upcoming information sessions will be attended by representatives of the ecological and acoustic consulting firms that performed assessments of the proposed wind farm. In particular, a representative of Ecology and Heritage Partners, who completed the Ecological Assessment and standalone Brolga Assessment, will be in attendance at the sessions held on Thursday 10 October, while a representative of Marshall Day, who completed the predictive noise assessment, will be in attendance at the sessions held on Thursday 17 October. Accordingly, should you wish to find out more information about one of these topics in particular, please register for one of the sessions at which the relevant subject matter expert will be in attendance.

Session format: Our plan is to start with a short presentation about the wind farm followed by a question-and-answer session afterwards. However, we will be flexible if those present wish to discuss a particular topic at length or wish to skip straight to questions and answers. Please note that the maximum group size will be ten participants per timeslot—this small group setting will allow for a more detailed discussion and personalised attention to your questions.

Registration: Please register by emailing your name, phone number and preferred timeslot to info@brewsterwindfarm.com.au, or alternatively by calling us on 0498 810 177. So that we can tailor the session to your specific interests, please submit any questions or topics you'd like us to cover when you register. Light refreshments will be provided so please also let us know if you have any dietary requirements.

Further information: If you would like further information about these information sessions, or would like to make a general enquiry about the Brewster Wind Farm, please contact us by telephone on 0498 810 177 or by email at info@brewsterwindfarm.com.au.

We thank you in advance for your time and look forward to responding to your questions at one of our upcoming information sessions.

Yours sincerely,

Severin Staalesen
Project Director
